TREAT YOUR PETS

To A Spa Day

Adopted this month:

DOGS:

Cookie
Skeeter
Snoopy
Milo
Summer

CATS:

Reba
Birdie
Bellatrix
Bucky

Dog Treats

32 oz of Plain Greek Yogurt
1 cup of Peanut Butter*
3/4 cup of Pumpkin Puree**

*Peanut Butter should be Xylitol free. Please read labels. Xylitol is the only ingredient in peanut butter that's bad for dogs.

**Pumpkin should be the only ingredient in the pumpkin puree. Avoid getting sweetened pumpkin puree.

Step One: Blend all the ingredients together, adding water as needed. Create a smoothie like consistency.

Step Two: Pour into silicone cups and freeze.

Sub Pumpkin Puree for no sugar applesauce or bananas to create new flavors for your dog to enjoy.

CAT OF THE MONTH

Peter is a 12-week-old kitten with sparkling white fur and cute tabby markings. He is extremely friendly and loves to be showered with affection.

Peter was discovered by a kind-hearted police officer when he was just a tiny kitten, stranded in the middle of the road. Thankfully, the officer acted quickly and was able to rescue him.

Now, Peter is ready to find his forever home and bring joy to a loving family.

•Interested in adopting, please email: info@freemanfritts.com

Freeman-Fritts Volunteer

Hooray for Freeman-Fritts Volunteer, Cathy Crayton!

Cathy loves hanging out in the shelter and socializing with the animals. She helps us out by walking the dogs and taking them to Goofy's Play Yard for some playtime. She also loves snuggling with the cats. Among Cathy's fave cats are Rue, Porsche and Reba, but she says that all the cats at Freeman-Fritts are loveable.

Cathy moved to Kerrville in 2014 after retiring from Continental Airlines as a flight attendant. At home, Cathy has two 13-year-old kitties: Frankie, a male ragdoll with big blue eyes and Cheetos, a female orange tabby.

Cathy is so happy she found Freeman-Fritts. It is a wonderful place where animals are given a second chance.

DOG OF THE MONTH

Charlie is still searching despite having almost 500 shares on his previous social media post!

Please continue to help us find the perfect home for this sweet guy!

Charlie is currently 6 years old and all 70 lbs of handsomeness is ready to start a new adventure!

Unfortunately, he is with us because his previous adopter's health began to fail and couldn't care for her pups anymore. We're now dedicated to getting him back to that life once again!

Charlie loves people and is eager to please! Come meet your new best friend!

Sponsor Kitty Of The Month: Jimmy

Jimmy may look ordinary, but he is anything but. He came to the shelter as a tiny kitten and was bottle fed so is a huge sweetheart, loving everybody.

Jimmy swaggers in like Jack Sparrow in "Pirates of the Caribbean". One day he was x-rayed, and we discovered that he had a congenital hip deformity causing the distinctive and endearing walk!

Jimmy has now become a permanent resident and change for him is not easy. He would love to have his very own sponsor mom/dad.

If you're interested in sponsoring Jimmy or another cat in our shelter, please don't hesitate to contact us. We'd be happy to answer any questions you may have and help you get started on your sponsorship journey. Thank you for supporting our mission to provide a safe and loving home for all cats in need.

Keep your cat cool in the heat

Water
 Make sure they have plenty of fresh water available. Never immerse your cat into water as this can lead to shock.

Warning signs
 All cats can suffer from heat stroke so it's good to know the signs:

- Fast and heavy panting
- Increased heart rate
- Excessive drooling
- Vomiting
- Excessive thirst
- Dark red or purple gums or tongue
- High body temperature
- Weakness
- Seizures or unconsciousness

Cooling them
 If you suspect your cat's suffering from heat stroke, move them to a cool spot (possibly a fan) and place cool wet towels across their body for a short period of time. Allow them small amounts of water to drink and keep cooling them until their breathing is regulated.

If you're worried, take your cat to the vet ASAP.

Never leave cats unattended in hot cars!

Dogs & Heatstroke

Signs of heatstroke
 Heavy panting, difficulty breathing, excessive thirst
 Bright red tongue and mucus membranes, which turn grey as shock sets in
 Thick saliva, drooling, vomiting, and/or diarrhea
 Unsteadiness and staggering
 Lethargy

By the time the signs of heatstroke are visible, it's often too late
